

THE SYNTAX-SEMANTIC INTERFACE IN YAQUI COMPLEX
SENTENCES: A ROLE AND REFERENCE
GRAMMAR ANALYSIS

by

Lilián Graciela Guerrero Valenzuela
December 10, 2004

A dissertation submitted to the
Faculty of the Graduate School of
The State University of New York at Buffalo
in partial fulfillment of the requirements for
the degree of

Doctor in Philosophy

Department of Linguistics

ACKNOWLEDGEMENTS

I will be forever grateful to my advisor, Robert D. Van Valin, Jr. His rich theoretical framework first encouraged my interest in Yaqui syntax and made me want to study at the University at Buffalo; his teaching later pushed me to find the really interesting issues of the discipline. He dedicated me a lot of his attention and time to discuss my ideas, with interest and enthusiasm. I would not have completed this dissertation if it were not for his guidance and encouragement. So much of my intellectual growth and confidence comes from him, and this is not an exaggeration.

I am grateful to the members of my committee, Jean-Pierre Koenig, Robert Hoening, and Bernard Comrie, for all their advising, suggestions, questions and critiques. Thanks for sharing your vast knowledge with me, for agreeing to read my unconventional analysis, and for forcing me to refine my arguments. Special thanks are also due to Carole Orsolits, professors and staff of the Linguistics Department at the University at Buffalo. Thanks also to the Romance Language and Literature Department.

From the desert-city front, thanks to my parents, Yolanda and Teófilo, my sister Aracely and her lovely daughter Nichole, my brother German, his wife Amparo, and their kids Alexia and German. I am grateful for their love, which has given me strength in carrying out my almost interminable studies. Thanks also to my eternal and supportive friends: Myrna, Dena, Julieta, Cruz Mónica, Conny. Special thanks must go to Amalia Hoyos, for many years of mutual teaching and learning, for her wisdom, encouragement, care and lovely companionship. So much of my emotional growth comes from her; I will be always indebted. Thanks also to Zarina Estrada for her constant academic support, as well as my professors and friends from the Universidad de Sonora.

From the snow-city front, thanks to my multinational friends: Joy, Jenn, Ameyo, Chris, Carolyn, Rodrigo, Purnima, Sabrina, Kazu, Hide, Heike, Frank, Silke, Tom, Yuki, Sayaka, Colette, Viktoriya, Sunyoung, Chief, Anne, Bindu, Sheila, Jorge Guitart, Sol and Pit, Gabriela and Robert, Michael and Nadia, and many others. Many thanks to Carmen and David for their unconditional friendship. Valeria deserves special thanks for endless discussions on linguistics, in general, and on RRG, in particular; for encouragement and clarity in many ideas (and ideals). All of you made me feel warm inside despite the harsh Buffalo winter.

My everlasting gratitude also goes to the Yaqui speakers who kindly shared their language with me. Thanks to Cresencio Buitimea, Asalia Buitimea, and Anabela Carlón, who helped me at the first stage of this study. Many thanks to Gregorio ‘Goyo’ Flores and his family -Aurelia, Jorge, Edgar, Ivan, Don Fermín, Doña Maria Luisa, and the rest of the family-, who tolerated my presence in their home for the last five years, and who never understood how I was able to survive in the United States without knowing how to make *tortillas* by hand.

Last, but not least, thanks to Rosita. You made so much good in me. You showed me life beyond syntax; you taught me to do my best in whatever I do; you pushed me to search for my own way of life; you renovated my enthusiasm and beliefs. It will be hard to continue the journey without you. Ne enchi waata; empo ka a beas kopte.

You have all shared with me the ups and downs and I am truly grateful. This could never have been completed without each and every one of you!

TABLE OF CONTENTS

Acknowledgments	iii
List of tables	x
List of figures	xi
List of abbreviations	xiii
Abstract	xv
Chapter 1: INTRODUCTION	
1.1. Scope of the study	1
1.2. The Yaqui language	4
1.3. Brief review of previous literature	5
1.4. Goals and data	8
1.5. Organization	11
Chapter 2: MORPHO-SYNTACTIC STRUCTURES IN YAQUI	
2.1. Noun Structure	12
2.1.1 Pronominal system	13
2.1.2 Case and postpositional system	15
2.1.3 Noun phrase structure	20
2.2. Verb Structure	21
2.2.1 Verb agreement	21
2.2.2 Syntactic transitivity	24
2.2.3 Tense, Aspect, Modal system	26
2.2.4 Changing the argument structure	34

2.3. Complex constructions	38
2.3.1 Relative clauses	38
2.3.2 Coordination	40
2.3.3 Adverbial clauses	41
2.3.4 Complement clauses	43
2.4. Summary	46

Chapter 3: ROLE AND REFERENCE GRAMMAR AND YAQUI VERBAL SYSTEM

3.1. A synopsis of Role and Reference Grammar	47
3.1.1 The syntactic representation of the sentence	48
3.1.2 The semantic representation of the sentence	56
3.1.3 The linking algorithm	70
3.2. The Yaqui verbal system	73
3.2.1 Test 1: intransitive subject	75
3.2.2 Test 2: <i>V-la</i> clause	78
3.2.3 Test 3: the causative paraphrase	82
3.2.4 Test 4: the <i>Vi /Via</i> result state phrase	84
3.2.5 Test 5: the resultative clause <i>-taka ta'awak</i>	90
3.2.6 Test 6: <i>V into jiba V</i> , the continuous event	92
3.2.7 Test 7: <i>laulauti</i> slowly-test	93
3.2.8 The Yaqui verb classes	95
3.3. Number suppletion as a semantic phenomenon	96
3.4. Summary	102

Chapter 4: SIMPLE CLAUSES IN YAQUI

4.1. One-place predicate	103
4.2. Two-place predicates	105
4.3. Three-place predicates	114
4.3.1 Lexical predicates	115
4.3.2 Derived predicates	131
4.3.2.1 Applicative clauses	131
4.3.2.2 Other valence-increasing mechanisms	140
4.4. Linking algorithm for Yaqui simple clauses	144
4.5. Summary	150

Chapter 5: THE NOTION OF CAUSATION

5.1 The layered structure of the clause for complex sentences	151
5.2 The notion of causation	157
5.2.1 Non-verbal causative constructions	159
5.2.1.1 Lexicalized causatives	159
5.2.1.2 Productive causatives	167
5.2.1.2.1 Morphological causatives <i>V-tua</i>	167
5.2.1.2.2 Result-state causatives: state + <i>yaa</i> ~ <i>joa</i>	170
5.2.2 Verbal causative constructions	175
5.2.2.1 Morphological and syntactic jussives	177
5.3 The nexus-juncture types in causative constructions	183
5.3.1 Semantic and morpho-syntactic tests	183
5.3.2 Nexus-juncture relations	193

5.4. Summary	204
Chapter 6: PHASE, PSYCH-ACTION AND PURPOSE	
6.1. Phase predicates	206
6.2. Psych-action predicates	216
6.2.1 <i>Want</i> -type predicates	218
6.2.2 <i>Promise</i> -type predicate	224
6.2.3 <i>Know how to</i> -type predicate	226
6.2.4 The <i>hope</i> -predicate	228
6.2.5 Other psych-action predicates	234
6.2.6 The nexus types for psych-action predicates	239
6.3. Purpose clauses	241
6.3.1 Coreferential-PSAs purpose clauses	242
6.3.2 Not necessarily coreferential-PSAs purpose clauses	247
6.3.3 The nexus-juncture types for purpose constructions	248
6.4. Summary	252
Chapter 7: PERCEPTION, MENTAL AND SAYING PREDICATES	
7.1. Perception predicates	255
7.1.1. Relative clauses vs. nominalized complementation	259
7.1.2. Direct and indirect perception	267
7.1.3. Juncture-nexus types of perception predicates	276
7.2. Propositional attitude predicates	288
7.2.1. The general notion of belief	289
7.2.2. The general notion of thinking	296

7.2.3. The general notion of wanting	301
7.2.4. Juncture-nexus types of propositional attitude predicates	305
7.3. Cognition predicates	313
7.3.1. The notion of knowing	314
7.3.2. Forget- and remember-type of cognitive predicates	320
7.3.3. Juncture-nexus types of cognitive predicates	326
7.4. Discourse predicates	327
7.4.1. Direct and indirect discourse	329
7.4.2. Juncture-nexus types of discourse predicates	339
7.5. Summary	346
Chapter 8: SYNTACTIC-SEMANTIC LINKING IN COMPLEX CONSTRUCTIONS	
8.1. A recapitulation of complex construction types in Yaqui	349
8.2 The linking algorithm for complex constructions	360
8.2.1. Linking in nuclear junctures	362
8.2.2. Linking in clausal junctures	364
8.2.3. Linking in core junctures	369
8.3 A functional-cognitive explanation for alternative constructions	385
8.4. Summary	393
Chapter 9: CONCLUDING REMARKS	395
References	400

ABSTRACT

This dissertation examines complex constructions in Yaqui and proposes an analysis within a Role and Reference Grammar (RRG) framework that links the syntactic and semantic representations of the constructions. The study is organized in two main components. The descriptive component addresses which units are involved in simple clauses. Chapter two provides the basic morpho-syntactic characteristics of the language. Chapter three introduces the basic theoretical principles and analyzes the verbal system. Chapter four investigates one-, two-, and three-place verbs, and demonstrates that the Actor-Undergoer Hierarchy needs to be modified in order to predict the undergoer selection in multiple object constructions. The explanatory component investigates three basic questions: (i) What are the units involved in complex sentences and what syntactic relations hold between them?, (ii) Does Yaqui follow RRG's general assumptions as a theory of universal grammar?, and (iii) Can RRG's theoretical assumptions elucidate Yaqui morpho-syntactic manifestations? Chapter five explores verbal and non-verbal causation. Chapter six analyses phase and psych-action predicates. Chapter seven examines perception, propositional attitude, cognition and discourse predicates. Chapter eight recapitulates the juncture-nexus types found, and lays out the linking process. One of the general findings of this study is that Yaqui-specific relations between the syntactic and semantic dimensions are mostly compatible but not identical to the cross-linguistic predictions of the Interclausal Relations Hierarchy. The language shows a marked shift from syntactic to morphological structure as going down the hierarchy. The juncture-nexus relationships allowed revealing the syntactic relations between the units involved. The semantic interclausal relations of the events permitted to better understand the

relation of each predicate with its complement. However, it was the formal interaction of the semantic and syntactic representations of the sentence that enabled to understand the intriguing manifestations of complex sentences in the language.
